

Customer Validation Solutions

Centercode's *portfolio of offerings* provides the people, processes, and technology the best brands in the world use to run their customer testing programs.

Over **70%** of companies feel that their customer testing programs aren't as effective as they should be. Without insightful, actionable feedback from real customers using the products in the real world, companies cannot confidently launch products that meet the increasingly high standards of mainstream technology users.

Centercode's platform, managed services, testers, and framework provide everything needed to run effective Alpha, Beta, and Field Tests, so you can collect relevant customer feedback and improve your products before launch.

The Included Twist Ties Feel Very Cheap

Testers feel that the twist ties are very cheap compared to the rest of the contents in the packaging. Some testers reported that twist ties were broken upon inspection.

Tester Quotes

"Everything was going great as I pulled stuff out of the box, except the twist ties that held the ethernet cord together were already broken."

"I enjoyed pulling everything out of the box. Things were neat and easily accessible. But, the twist ties around the cords looked like twist ties on bread and took the feel of quality out of most the experience."
