# Mistake #1: Vague Instructions

1. Find custom settings
2. Report ease of locating settings

1. Navigate to where you would expect to find a feature called 'Custom Settings'
2. Provide feedback on ease of locating 'Custom Settings' in the Week 1 Survey: [here](#) (link)

# Mistake #2: Missing Logistical Steps

1. Install and launch iOS beta app

1. Install iOS beta app
2. Go to Settings > General > Profiles, then select 'Trust'  
Note: This step is only needed for beta testing and won't appear in the release app
3. Launch iOS beta app

# Mistake #3: Poor Readability

Android users, download the app here:
