INSIGHTS

With automation, cloud, and AI on the rise, global Enterprise Software spending is projected to reach $1.23 trillion in 2025, up 14% year over year. Testing enterprise software across a global org tends to be a rat's nest of org charts, legal agreements, email, and spreadsheets that often leads to buggy releases.

As companies digitize workflows and change how products are sold and delivered, Centercode keeps the Voice of the Customer at the forefront. It gives developers on-demand access to feedback so they can make changes in real time, ship releases faster, and keep enterprise customers happier.
