INSIGHTS

The Home Audio market is projected to grow from about $42B in 2025 to $120B by 2030, driven by surging demand for portable entertainment and advances in wireless technology.

Evaluating the finer details, like speaker and subwoofer positioning or precise audio calibration across varied home environments, is the key to products audiophiles will pay up for. Centercode helps companies validate that their products look, feel, and operate the way picky hi-fi fanatics expect.
